

PEACE_INTEL

LAUNCHING JANUARY 2027

Ask the field.

What has helped local ceasefires hold, and under what conditions?

STUDIES · EVALUATIONS · DATASETS

WHAT'S BEEN TRIED

WHAT WORKED

WHAT FAILED

WHO FOUND IT

INTRODUCING PEACE INTEL

What the field has learned, tailored to your questions.

Peace Intel brings together thousands of studies, evaluations, hard-to-find research and conflict data, including premier datasets like AfP's EIRENE. Ask a practical question about a conflict, strategy, or proposed intervention and quickly find expert insights from the field on what has been tried, what worked, what failed and under what conditions.

Unlike general-purpose AI, Peace Intel does not simply produce an answer; it's a practitioner-trained thinking partner that helps users **trace claims and expert judgments back to the studies, data, cases, and people they came from.**
